1 INTRODUCTION

We, Stephen Little & Associates, Chartered Town Planners & Development Consultants, 26/27 Upper Pembroke Street, Dublin 2, have prepared this Audit of Community Infrastructure, as part of an LRD planning application for amendments to ABP Reg. Ref. 306569-20 (SHD 1) and 310567-21 (SHD 2), at 42A Parkgate Street, Dublin 8.

This document has been prepared in compliance with the provisions of **Policy QHSN48** of the Dublin City Development Plan, 2022 – 2028. The purpose being to contribute to the ongoing assessment and monitoring of community facilities by Dublin City Council, and to identify the additional facilities being provided by the proposed scheme.

The audit describes the proposed development and provides a breakdown of infrastructure and community services available within a defined catchment area of the application site. The audit identifies the catchment area as the lands within a 1000m radius of the site, with special attention paid to those services and resources located within 500m of the site.

Community infrastructure includes a wide range of services and facilities that address the quality of life needs of the local community and can support the proposed housing development. In particular, health, education, community, cultural, play, faith, recreation and sports facilities.

2 SITE CONTEXT

The application site is located between Parkgate Street and the River Liffey, beside Sean Moore Bridge, in Dublin 8. It was formerly occupied by Hickey's fabrics.

The development site is well served by public transport and within walking distance of a number of public transportation services. Heuston Railway Station lies approximately 200m (a 3 minute walk) from the site and provides national and regional rail services, as well as the Heuston and Museum Red Line LUAS stops. The nearest bus stop is immediately to the front of the site at Parkgate Street and is served by numerous bus routes including nos. 26, 69, C5, C6, 707, 842, 845, 51D, 52, 60, 735, C1, C2, C4, P29, 69X, X25, X27, X28, X30, X31 and X32. There are also number of Dublin Bike stands within the immediate vicinity of the subject site at Parkgate Street, Heuston Bridge (North) and Heuston Bridge (South).

The site is well served by local and city centre amenities, within easy walking or cycling distance. Directly adjacent to the subject site are local neighbourhood facilities such as a neighbourhood convenience shop, a post office and several café/restaurant units and public houses. The Aisling hotel is also nearby.

The Central Criminal Court and Phoenix Park lie immediately to the north west. Phoenix Park, one of the largest urban parks in Europe, provides a significant public open space amenity and includes playing pitches, polo and cricket grounds, a children's playground, Dublin Zoo, tea rooms and a visitor centre. It is also home to Aras an Uachtaráin, the US Ambassador's Residence, Farmleigh, Ordnance Survey Ireland, St Mary's Hospital and nursing home.

The application site is also proximate to a number of other open spaces including The Croppies Acre (within 300m), Irish Museum of Modern Art Gardens, Irish War Memorial Gardens and Grangegorman Playing Fields.

Heuston South Quarter and Thomas Street are located within 1 km of the subject site. This area which contains a wide array of amenities such as banks, post office, local offices, restaurants, public houses, community and cultural facilities.

Henry Street, one of Dublin's primary shopping streets, is located within 2km of the application site.

St Patrick's Hospital, St James' Hospital and DTU Grangegorman campus are located within 2km of the site.

2.1 Proposed Development

The proposed development seeks amendments to consented Strategic Housing Development ABP-306569-20 (SHD 1), as amended by ABP-310567-21 (SHD 2) and Section 146B amendments ABP-311499-21 & ABP-311507-21 (i.e. 'the consented scheme'). The proposed amendments to the consented scheme include:

- 40 no. residential apartments over 8 floors (30no. 2-bed/4 person & 10no. 2-bed/3 person units, each with a private 'winter garden' and/or balcony on the south and/or north elevation, at 1st to 8th floors inclusive), replacing consented office floor area (c.4,113sqm total, over 6 floors) within the Block B2 building.
- Co-working (c.229 sqm) and community/cultural space (c.52 sqm) at ground floor level, replacing consented café/restaurant (c.236sqm) at Block B1.
- Reconfiguration of ancillary internal residential communal amenity area at mezzanine level, to include residents' lobby, lounge and fitness area (c.256sqm), replacing the consented residential amenity co-working space (300sqm) at Block B.
- And all ancillary and associated site, structural and landscape works proposed to tie amended Block B2 in with the consented scheme, including:
 - Design adjustments at the interface of proposed Block B2 with the consented adjoining Block A building to the east and Block B1 to the west, including tie-in of residential floor levels and increase in roof parapet height (by 1.0m) of Block B2.
 - Amendments to permitted landscaping at roof level of Block B2 and part of Block B1 to accommodate proposed change to Block B2 roof level.
 - Alteration of the northern Parkgate Street façade of Block B2 to suit residential use and to accommodate external, recessed private amenity (wintergardens & balconies).
 - Alteration of the southern façade of Block B2 to suit residential use and to accommodate external, recessed private amenity (balconies).
 - 20no. additional visitor bicycle spaces and 2no. cargo bike spaces within the consented public realm at surface level.
 - Minor footprint extension and reconfiguration of internal floor plan at permitted basement / undercroft, resulting in an increased floor area from c.144sqm to c.164sqm, to accommodate additional ancillary residential bicycle storage (80no. spaces).
 - Reconfiguration of ground and mezzanine floors of consented Block B1, to accommodate the proposed co-working and reconfigured residential amenity areas and additional ancillary refuse, circulation, plant and non-residential back of house areas.
 - Removal of combined heat pump/chiller unit with associated screening on the roof of Block C.

3 DEMOGRAPHIC PROFILE

Census 2022 data indicates that at a national level, the population grew 8.1%, over the period 2016 – 2022. The population of Dublin City grew by 6.9% for the same period (2016 – 2022).

Census 2016 data indicates that at a national level, the population grew by 3.8%, over the period 2011– 2016. In the same period, the population of Dublin City grew by 5.1%.

This shows that population growth for the state and Dublin City has increased.

Census 2022 data indicates that Phoenix Park ED has a population of 1,465 persons, compared to a population of 1,534 persons in 2016. This amounts to a percentage population reduction of -4.5% in contrast to the overall population growth of Dublin City (6.9%) for the same period.

For convenience, the following table summarizes the population changes discussed above: -

Category	% Change 2011 -2016	%Change 2016-2022
National	3.8%	8.1%
Dublin City	5.1%	6.9%
Phoenix Park ED	-0.3%	-4.5%

Table 1: Population change from 2011-2016 and 2016-2022

The immediately surrounding electoral divisions are Arran Quay C, Arran Quay D, Ushers A and Ushers B. Below is a breakdown of the population as per the last recorded Census:

Census Year	2011	2016	2022	Population Change (2011-2016)	Population Change (2016-2022)	% Change (2011-2016)	%Change (2016-2022)
Phoenix Park	1,538	1,534	1465	-4	-69	-0.3%	-4.5%
Arran Quay C	4,170	4,471	4646	+301	+175	7.2%	3.9%
Arran Quay D	3,218	3,109	3308	-109	+199	-3.4%	6.4%
Ushers A	3,089	3,930	5117	+841	+1187	+27%	30.2%
Ushers B	1,292	1,312	1903	+20	+591	1.5%	45%
Total EDs	13,307	14,356	16,439	+1,049	+2,083	7.9%	14.5%
Dublin City	527,612	554,554	592713	+26,942	+38,159	+0.051%	0.069%

Table 2: Population change in surrounding Electoral Divisions from 2011-2022.

At the 2022 Census, the Phoenix Park ED recorded a population decrease of -4.5% from 2016. Arran Quay C and Arran Quay D immediately north of the subject site recorded a population increase of 3.9% and 6.4% respectively.

By comparison, the Ushers A and B electoral divisions recorded significant population growth. The highest increase was identified in Usher B. The population growth in Usher A may be partly explained by the build out and occupation of the Clancy Quay development at Island Bridge in recent years.

Overall, the area comprising these Electoral Divisions saw an average of 14.5% population growth between 2016 and 2022, which is significantly higher comparatively to the growth experienced within the administrative area of Dublin City (6.9%) and nationally (8.1%).

In terms of age cohorts, overall, the study area comprising the Electoral Divisions has seen a significant increase in the young dependent cohort (0–19-year-olds), and a moderate percentage increase in the working age cohort (20-64 years) and older dependent (65+ years) cohorts, between the 2016 and 2022 Census periods.

As may be seen from the tables below, the population trends in the study area diverge from those of the wider administrative area of Dublin City. In the wider Dublin City area, between the 2016 and 2022 Census, there was a moderate percentage growth of younger dependent age cohort (0-19yrs) and working age cohorts (20-64yrs) and a slightly higher percentage growth of older dependents (65yrs +). At State level, 26% of the population was recorded as being between the age of 0-19 years in 2022. 15% were of the population were recorded as being over 65 years in 2022 at State level.

Census 2022	0-19 yrs	20-64 yrs	65+ yrs	Total Persons
Phoenix Park	121	1078	266	1465
Arran Quay C	547	3921	178	4646
Arran Quay D	526	2433	349	3308
Ushers A	480	4398	239	5117
Ushers B	354	1453	96	1903
Dublin City	118,872	394,473	79,368	592,713

% Change	0-19 yrs	20-64 yrs	65+ yrs
Phoenix Park	-30%	-3.2%	-8.3%
Arran Quay C	16.4%	1.6%	26.2%
Arran Quay D	35.2%	3.4%	-4.6%
Ushers A	25.7%	31.6%	16%
Ushers B	69.4%	37.1%	102.3%
Total EDs	28.4%	13.2%	7.8%
Dublin City	6.1%	6.6%	9.7%

Tables 3 - 4: Demographic data Electoral Divisions from 2016-2022

The population levels in the ED within which the subject site is located, experienced a moderate decline in population between Census 2016 and Census 2022, in contrast to the relatively strong population growth of Dublin City for the same period.

4 METHODOLOGY

The Audit of Community Infrastructure consists of three stages: -

1. Establishing what the 'Existing Provision' of Community Infrastructure is in the Audit area.
2. Determining what the 'Future Needs' in terms of Community Infrastructure are in the Audit area.
3. Making outline recommendations on identified requirements, including consideration of key priority focus areas.

We have followed the methodology undertaken by Dublin City Council in its Audit of Community and Social Infrastructure for the Dublin Docklands Area.

5 COMMUNITY INFRASTRUCTURE TYPES

The Audit catchment extends to lands within a c. 1000m radius of the site, with special emphasis paid to those services and resources within a c.500m radius of the site. A 500m walk is generally considered to take 5-6 minutes; a 1000m walk 10-12 minutes.

The audit seeks to identify how well met the needs of the local population are in terms of community infrastructure within this catchment area. For the purpose of this audit, community infrastructure generally includes the following facilities and amenities:

- Education/Training - including pre-schools, primary, secondary, third level and upskilling workshops, adult education, evening course, traineeships etc.;
- Health - including health centres, GPs, health nurses, dentists and other health care professionals;
- Sports & Recreation - including parks, sports centres, sports clubs, play areas, playing pitches etc.;
- Social/Community Services - including local authority services, statutory welfare services, public libraries and community services;
- Arts & Culture - including museums, heritage attractions, theatres, performance areas, art and music centres etc.;
- Faith - including churches, related community halls and centres;
- Other - including post offices, credit unions and transport.

6 EXISTING PROVISION

6.1 Education and Training

Within 500m

No primary or secondary schools are located within 500m of the subject site.

Within 1000m

- St. James's Primary School,
- Canal Way Educate Together School
- Stanhope Street Convent Primary School
- St. Gabriel's National School

In addition to this, there are two Secondary Schools within 1 kilometre. These are:-

- CBS James's Street
- St. Josephs Secondary School

There are 38no. primary schools and 10no. post-primary schools in the surrounding Dublin 8 and Dublin 7 area. Of these, 4 no. primary schools and 2no. post primary schools are within 1000m of the subject site. These are outlined in the following Map and shaded in green in Table 5 below:

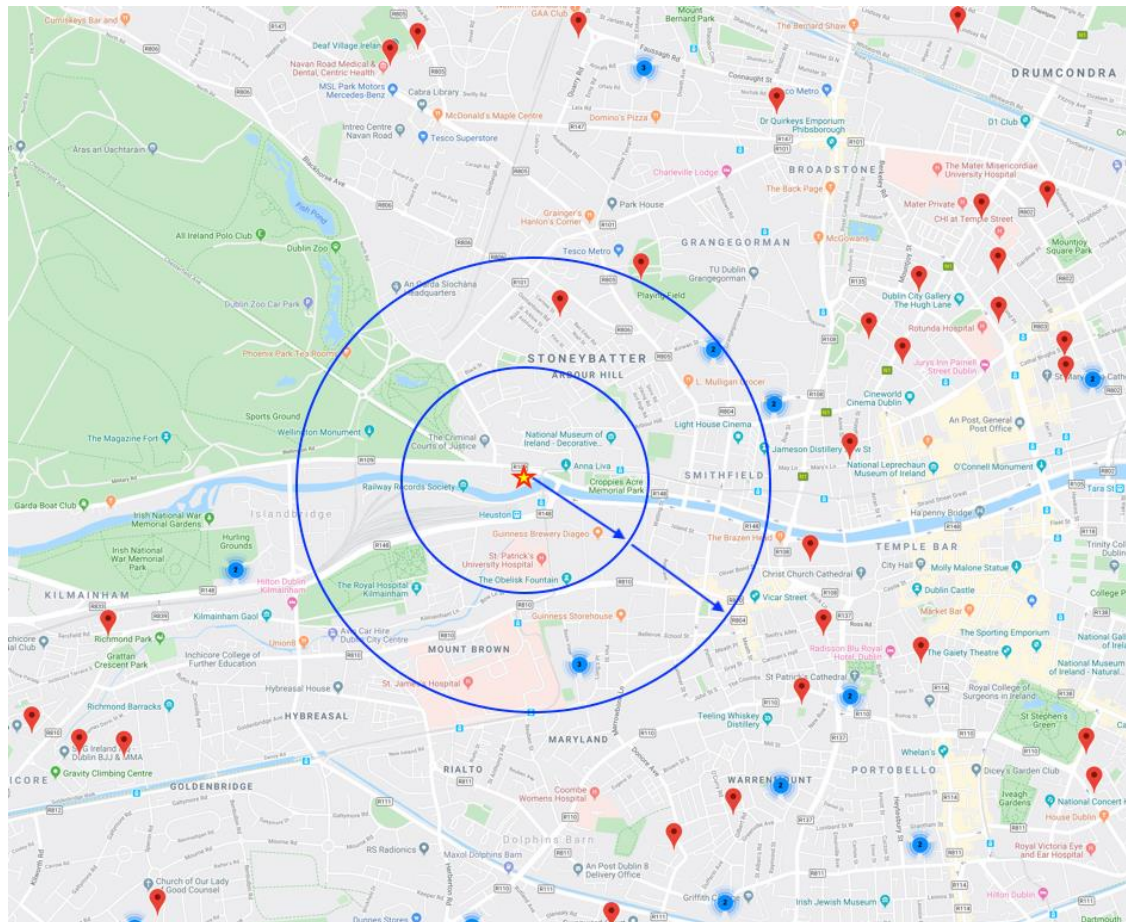

Figure 1: Primary and Post-Primary Schools. Extract from Department of Education and Skills, School Search Results Map. Approximate location of subject site (yellow star), with approximate 500m and 1000m radii marked in blue.

6.1.1 Assessment of Schools Demand Arising from Proposed Development

Section 4.2 – 4.4 of the ‘Sustainable Residential Development in Urban Areas Guidelines 2009’ outlines the provision for school places in conjunction with residential development, as follows;

4.2 *New residential communities can generate a demand for a significant number of new school places, particularly where families are attracted to the area. In such cases, it is vital to the process of supporting sustainable communities that the planning system facilitates the timely provision of new school buildings. Detailed guidance on planning for school provision through the development plan, local area plan and development management processes and the roles, responsibilities and specific actions to be taken in relation to forecasting future demand for school places is available in the Joint Code of Practice on Provision of Schools and the Planning System (August 2008).*

4.3 *No substantial residential development should proceed without an assessment of existing schools capacity or the provision of new school facilities in tandem with the development.*

4.4 *Within the development management process, it is recommended that planning applications for 200+ dwelling units should be accompanied by a report identifying the demand for school places likely to be generated by the proposal and the capacity of existing schools in the vicinity to cater for such demand. In very large-scale residential developments (say, 800+ units), planning authorities must consider whether there is a need to link the phased completion of dwellings with the provision of new school facilities.*

The proposed development includes 40no. residential apartment units. While this is not in excess of the 200+ unit threshold, we would note that cumulative development of the proposed and consented scheme would amount to 559no. residential units. This quantum of development still

remains significantly lower than the threshold of 800+ units identified in the Guidelines for consideration of phased completion of development linked with schools provisions.

A crude assessment of the demand arising from the consented and proposed development was determined by multiplying the consented number of units (519no.) and proposed number of units (40no.) by the projected Average Household Size for Dublin City in 2022. An average household size of 2.5 in Dublin City is derived from the 2022 Census.

The Forward Planning Unit of the DES has previously confirmed that the following percentages of the estimated population is utilised to determine the likely population of school going age: -

- Primary School: 12%.
- Post-Primary: 8.5%.

It would be reasonable to assume that the proposed studios and 1-bed units are unlikely to generate demand for schools, similar to the methodology for childcare provision. However, on the basis of the 559no. total units in the consented and proposed scheme and an average household size of 2.5 persons, the projected population is c. 1,398 persons. We note that the projected population from the proposed scheme alone is 100no. persons. Using the DES figures above, that population across the consented and proposed scheme is estimated to produce a demand for 168 spaces for primary schools and 119 for post primary schools. While the proposed scheme alone (40no. units) is estimated to produce a demand for 12no. primary school spaces and 8.5no. secondary school spaces.

Completion of the development is not expected before 2025 Any increase in population in the area would not therefore be felt immediately by school infrastructure in the vicinity. The occupancy lag would allow time for the DES and the Planning Authority to plan to accommodate any estimated surge in demand for school places arising from residential development in this area through the development plan process. In their recent report on enrolment projections (*Regional Projections of full-time enrolments Primary and Second Level, 2019 – 2036*) the Department of Education and Skills findings indicate a peak demand for primary and post primary enrolments up to 2019 which is expected to drop off year on year up to 2036.

The Department of Education and Skills have determined ‘School Planning Areas’ which would generally delineate the catchment area for a proposed residential development. At the time of this audit a ‘School Planning Area’ map was not available for the development area, so for the purposes of this study, a desk-based assessment was conducted into the existing and planned provision of primary and post- primary schools in Dublin 8 and Dublin 7, having regard to the Department of Education website.

*Numbers derived from direct contact to these schools by SLA

Table 5: Department of Education and Skills, primary and post-primary schools enrolments for the academic years 2020, 2021 & 2022. Schools within 1.5km of the site are highlighted in green. Where enrolments have declined since 2020, figures are highlighted in red (source: www.education.ie).

An estimation of the available capacity within each school can be determined based on the Pupil to Teacher Ratio (PTR). According to the DES, the recommended PTR for primary level education is 1no. teacher for every 27no. pupils. To calculate the capacity for each Primary School the number of classrooms in each school was determined by reference to the data available on the DES website (www.education.ie - information on Class Size- Individual Class Data). The number of classrooms in each school was then multiplied by 27, to determine the maximum capacity of the school. This figure was then subtracted from the enrolment figure to ascertain the number of additional spaces available.

Table 5 above indicates an overall growth in enrolment in primary schools in the general area since 2020. This is also true for the primary schools identified within the 1.5km catchment of the application site. However, with regard to primary school capacity to absorb the proposed development, Table 5 indicates that there is 1,866 spaces available within the existing primary schools within the Dublin 7 and Dublin 8 area. Of these, 333 spaces are within 1.5km of the application site.

In addition, the DES Building Programme plans for the construction of 5 schools in Dublin 8 and Dublin 7 in the coming years (see Table 6 below). These plans principally involve rebuilding existing schools. Details of the proposed capacity of these rebuilt schools is not available. However, the Department advises that most new schools must have the capacity to operate schools in the size range of 800 to 1,000 pupils.

Table 6: Department of Education and Skills - Current status of large-scale projects being delivered under the school building programme (June 2023).

Regard should also be had to the likely enrolment projections for Primary and Post-Primary Schools as set out by DES. The projections indicate that Primary School enrolment will be in decline since 2019. This is shown in table 7 below.

	Dublin	Mid-East	Midlands	Mid-West	South-East	South-West	Border	West	Total
2018	144,509	93,774	38,597	56,058	51,789	81,045	48,939	53,108	567,819 ²

Table 7: Department of Education and Skills – Projected enrolments in primary schools by region, 2018-2036

The expected completion date of the proposed development is not before 2025. Any theoretical increase in demand for school places would not therefore be immediately felt by the educational facilities within the catchment area. The completion would coincide with a steady decline in demand for primary school spaces in Dublin.

Having regard to the demand for primary school places potentially arising from the consented and proposed development (168no. spaces), the estimated additional pupil capacity (333no. spaces within 1.5km), and the planned schools under the DES Schools Building Programme, it is anticipated that the existing and planned primary schools would comfortably cater for the consented and proposed development.

Post Primary

With regard to post primary schools, the Forward Planning Unit of the DES assess the demand for Post-Primary Schools by using information obtained from long-term enrolment figures for ‘feeder schools’ (i.e. primary schools within the catchment area of the post-primary school) and projected population forecasts for an area. Unfortunately, this information is not available to the general public. Therefore we are unable to assess the demand or capacity of post primary schools in this manner.

Post primary school enrolment in the area has generally increased in recent years in the study area. Table 5 shows evidence of some increase in enrolment figures for the post primary schools within 1.5km of the application site, since 2020. However, it is generally accepted that travel distances to post primary schools can be longer than those to primary schools. The availability of public transport facilities in the area would support this. Therefore a wider range of options for post primary schools exists and this suggests that there is capacity to absorb potential additional demand for post primary school places arising from the consented and proposed development.

6.1.2 Third Level Education

Worth noting that being located on the western edge of the City Centre, the site is reasonably accessible to a number of 3rd level colleges, including TU Dublin Grangegorman and Trinity College Dublin.

6.2 Health

The following private and HSE nursing homes are identified in the Dublin 7 and Dublin 8 area:

Private Nursing Homes	HSE Nursing Homes
Curam Care Home, Navan Road, Cabra, Dublin 7	Cuan Ros Unit for the Elderly, Navan Road, Dublin 7
Santa Sabina House, Cabra, Dublin 7	The Meath Community Unit, 1-9 Heytesbury Street, Dublin 8
Croft Nursing Home, 2 Goldenbridge Walk, Inchicore, Dublin 8	Hollybrook Lodge (St. James' Hospital), Dublin 8
Nephin Nursing Home, 132-134 Navan Road, Cabra, Dublin 7	

Table 8: Private and HSE Nursing Homes in the Dublin 7 and Dublin 8 Area (source: www.hse.ie)

The following healthcare facilities are identified within the **500m** catchment:

- Heuston South Quarter Pharmacy
- Dublin Dental Specialist Clinic
- St. Patrick's University Hospital

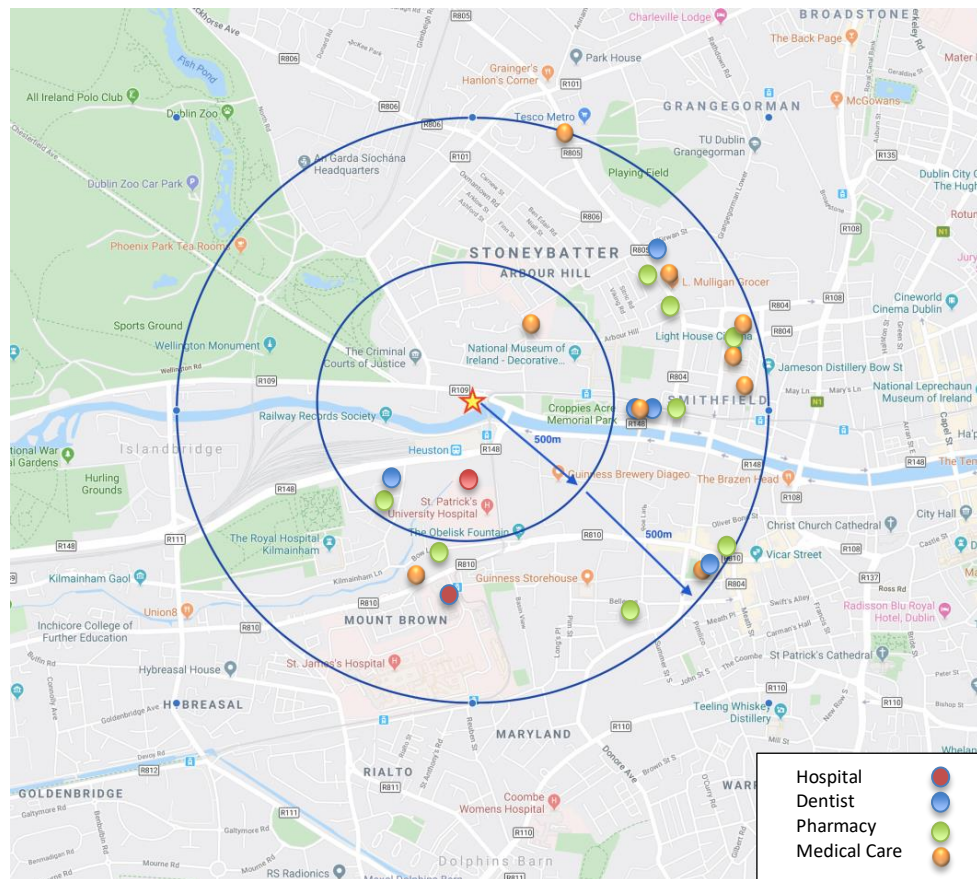

Figure 2: Map showing location of healthcare and medical facilities.

Within 1000m:

- St. James's Hospital
- Thomas Court Primary Care Centre
- Cassidy's Pharmacy
- Blackhall Pharmacy
- Lloyds Pharmacy
- Easy SOP Pharmacy
- Janet Dillon Pharmacy
- Market Pharmacy Smithfield
- Liberites CarePlus Pharmacy
- Plaza Health Smithfield
- St. James's Medical Centre
- Medicus Medical Centre
- Charter Medical Smithfield
- Polska Przychodnia Smithfield
- Stoneybatter Family Practice
- Manor Street Family Practice
- Marinas Brilliant Smile Dental Services
- Art Medica Dental Clinic
- One Manor Place Dental Practice

6.3 Sports & Recreation

Within 500m:

- Phoenix Park
- Anytime Fitness Kilmainham
- Avona Boxing Club
- The Croppies Acre Park

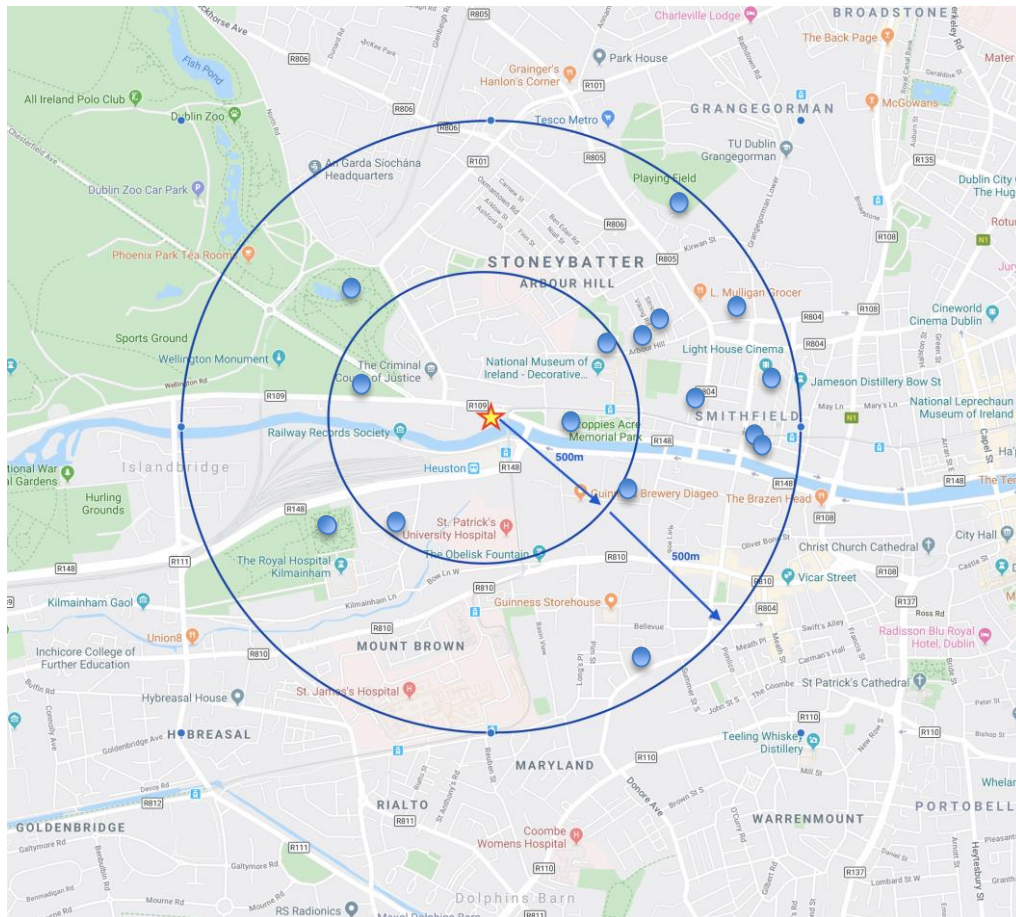

Figure 3: Map showing location of sport & recreation facilities. Each facility is represented by a blue dot.

Within 1000m:

- St. James's Gate Health & Fitness Club
- 1 Escape Healthclub Smithfield
- Lift Training Studios Smithfield
- Viribus Crossfit Smithfield
- FUSE Fitness Smithfield
- TU Grangegorman Playing Fields
- Arbour Hill Boxing Club
- F45 Training Grangegorman
- The Royal Gardens at the Royal Hospital Kilmainham
- St. Catherine's Sports Centre
- Marshall Art Incorporated Dublin 7
- Origins Muay Thai
- Boss Hot Yoga Studio
- Phoenix Park Playground
- Grangegorman Playground

A number of additional sports facilities exist within reasonable proximity of the site, such as the Irish War Memorial Hurling Grounds, St. Brendan's GAA Club, Navan Road United FC, Dublin Municipal Rowing Club, Dynamo Dublin FC, Bohemian FC Football Grounds, Oblate Basketball Club, Richmond Park Football Club, Liffey Gaels GAA Club all within 3km of the subject site.

6.4 Social & Community Services

Within 1000m:

- St. Catherine’s Community Centre
- Aughrim Street Sports Hall
- St. James’s Parochial Hall
- Blackhall Street St. Pauls Community Hall
- Stoneybatter Community Training Centre
- Aughrim Street Scout Group

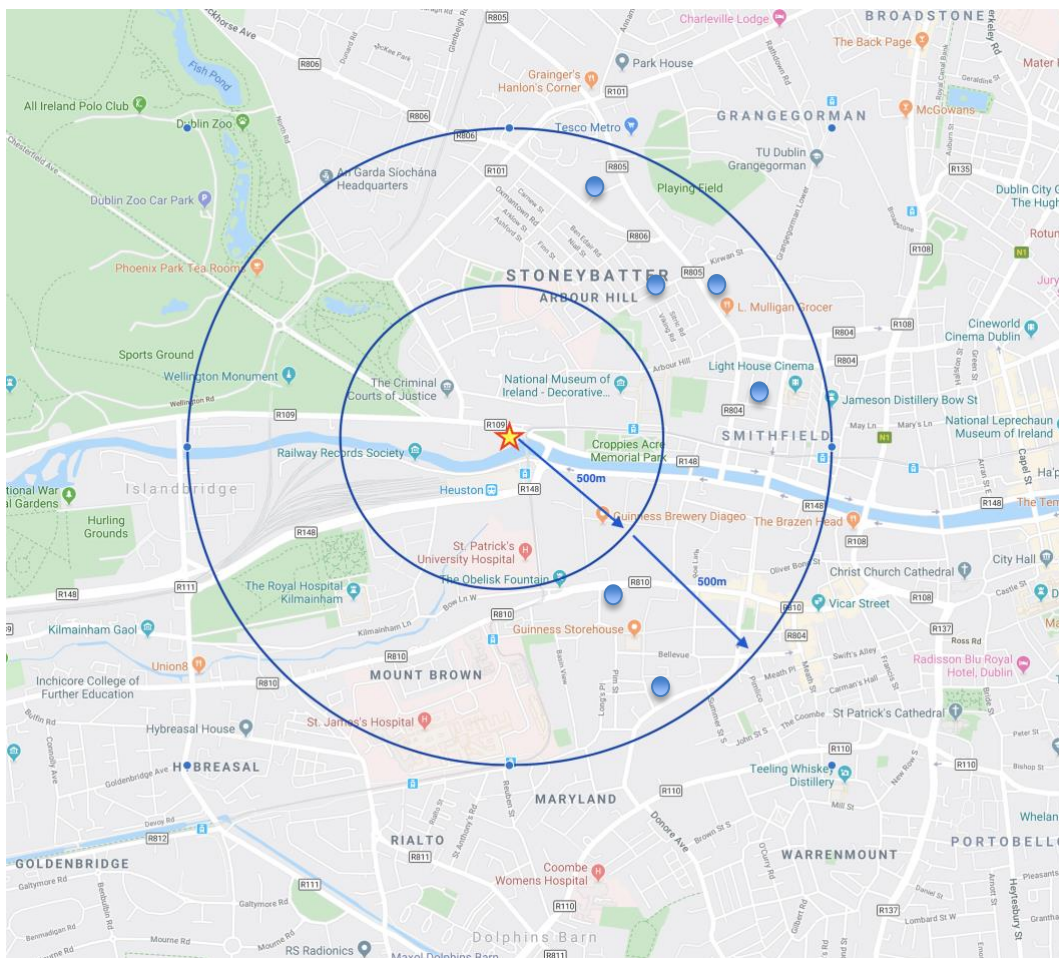

Figure 4: Map showing location of social & community facilities. Each facility is represented by a blue dot.

Inchicore Library and The National Visual Arts Library NIVAL are also both within 1.5km of the application site

6.5 Art & Culture

Within 500m:

- National Museum of Ireland
- Pearse Lyons Distillery
- Guinness Open Gate Brewery
- Mother's Tankstation Arts Centre
- National College of Art & Design

Within 1000m:

- Guinness Storehouse
- Irish Museum of Modern Art
- Lighthouse Cinema
- Jameson Distillery

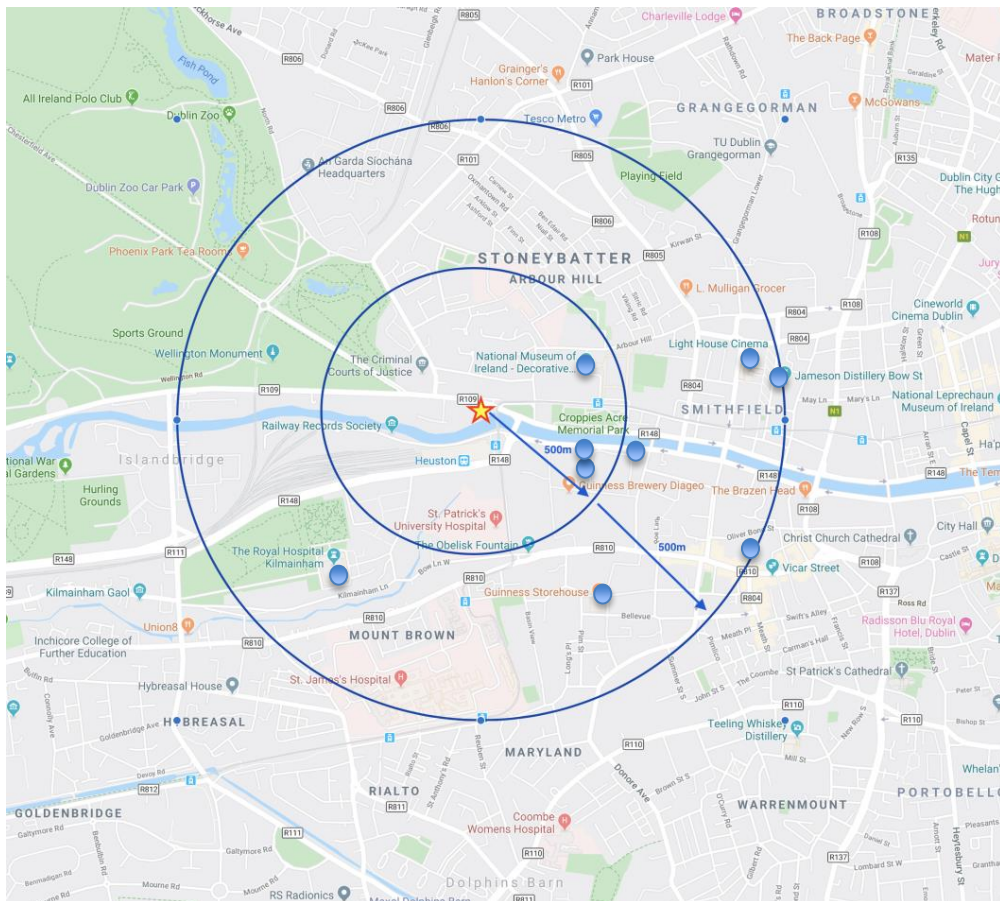

Figure 5: Map showing location of arts and culture facilities. Each facility is represented by a blue dot.

It is worth noting that a number of additional cultural facilities exist within reasonable proximity of the site, such as the Zoological Gardens, Aras an Uachtairin and Farmleigh Estate within Phoenix Park, Kilmainham Gaol, Irish War Memorial Gardens, Vicar Street Venue, Vaults Live theatre.

The site is at the western edge of Dublin City Centre, which provides a wide arts and culture offering.

6.6 Faith Services

Within 500m:

- Sacred Heart Catholic Church
- Greek Orthodox Church of the Annunciation

Within 1000m:

- St. James’s Catholic Church
- St. Catherine’s Church of Ireland
- Aughrim Street Parish

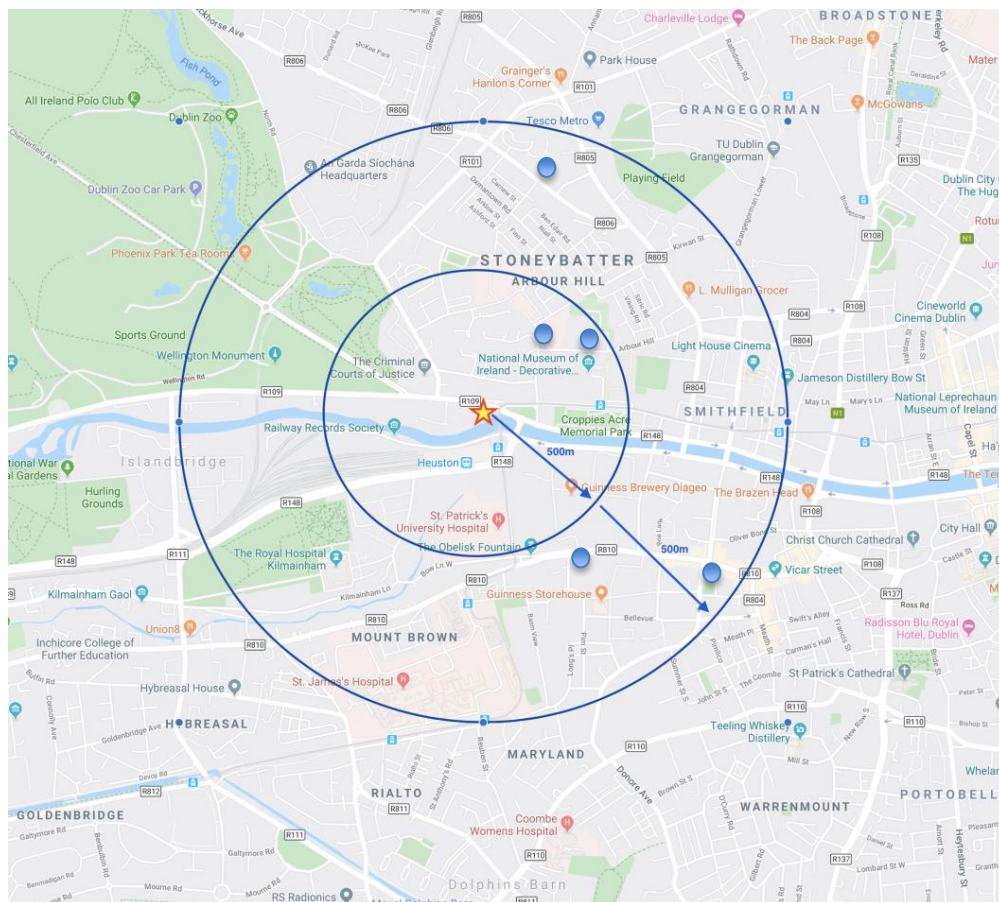

Figure 6: Map showing location of faith services. Each facility is represented by a blue dot.

6.7 Other Services

Within 500m:

- Heuston Station
- Dublin Bus routes 26, 69, C5, C6, 707, 842, 845, 51D, 52, 60, 735, C1, C2, C4, P29, 69X, X25, X27, X28, X30, X31, X32
- LUAS Red Line

Within 1000m:

- Kilmainham Garda Station
- James’s Street Credit Union
- James’s Street Post Office
- Aonghus McCarthy Solicitors
- Tracy Horan & Co. Solicitors
- Cahir O’ Higgins Solicitors
- Michael Kelleher Solicitors

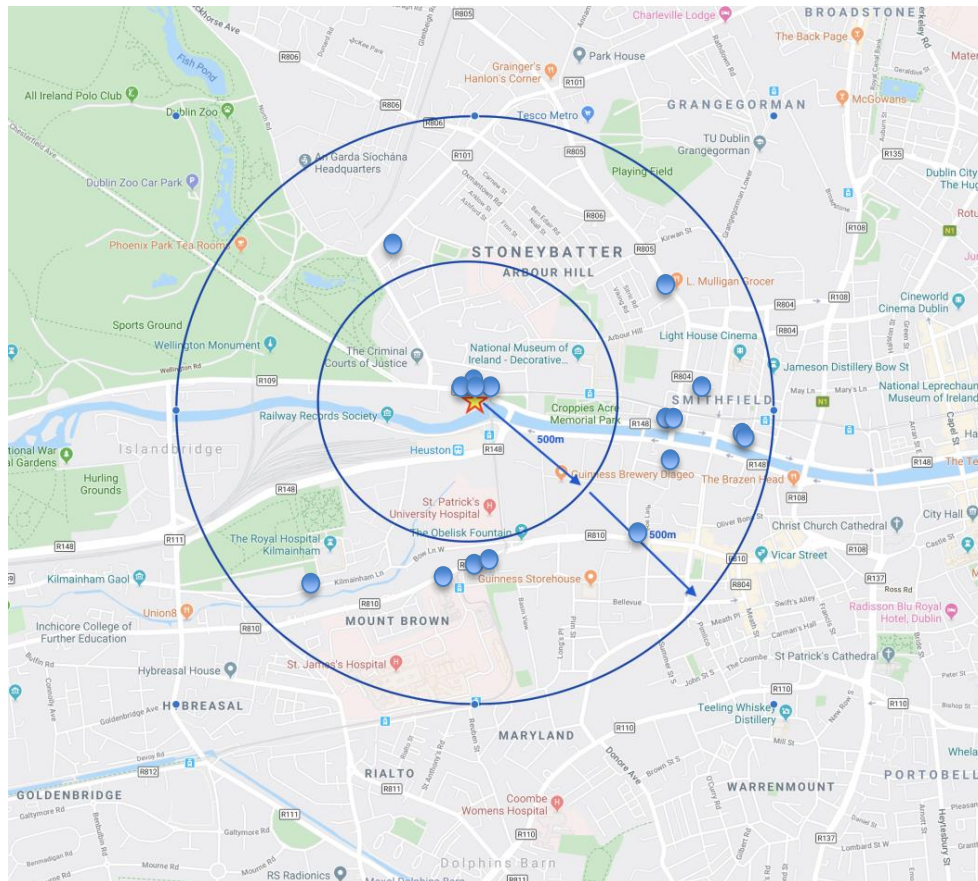

Figure 7: Map showing location of other services and facilities. Each facility is represented by a blue dot and Dublin Bus routes are represented by the blue arrows.

7 FUTURE NEEDS ASSESSMENT

The purpose of the community audit is to determine if the Heuston area is well served by community related facilities to support the future residents of the proposed development.

Section 3 of this report discusses the demographic profile of the area, it can be seen that there is an overall population increase in the young dependent cohort (0–19-year-olds), and a moderate percentage increase in the working age cohort (20-64 years) and older dependent (65+ years) cohorts, between the 2016 and 2022 Census periods.

Section 2 identifies the nature of the proposed and consented scheme, including the residential, food & beverage, cultural and recreational uses within the combined scheme. Section 6 identifies the existing services within a 500m and 1000m catchment area of the site, which are broad ranging.

The audit finds that the area is well serviced in terms of community infrastructure, as examined in Section 6 above.

Having regard to the schools assessment conducted which is outlined in Section 6.1 of this report, in our professional opinion, the demand created for school places by the proposed development will be comfortably absorbed by the existing educational facilities in proximity to the application site.

The most recent Department of Education and Skills enrolment data on primary schools indicates that there has been a general increase in enrolment figures for primary schools in the study area over the past number of years. However, there is also planned development of future schools under the DES Schools Building Programme in the Dublin 8 and Dublin 7. Our assessment of existing primary schools capacity indicates that there is sufficient capacity to absorb any demand for primary school places arising from the consented and proposed development, both within the 1.5km catchment and in the wider Dublin 7 and Dublin 8 area.

Post primary school enrolment in the area has generally increased in recent years in the study area. Table 5 shows evidence of some increase in enrolment figures for the post primary schools within 1.5km of the application site, since 2020. However, it is generally accepted that travel distances to post primary schools can be longer than those to primary schools. The availability of public transport facilities in the area would support this. Therefore a wider range of options for post primary schools exists and this suggests that there is capacity to absorb potential additional demand for post primary school places arising from the consented and proposed development.

Given the likely timeframe for construction and occupation of the consented and proposed development in its entirety, the DES would have an opportunity to consider local demand for school places and any requirement to expand existing or provide new facilities in this area in the next tranche of its Capital Investment for Schools Infrastructure, should the need arise. It is therefore concluded that the existing provision of schools in the area is sufficient to cater for the proposed development.

The subject site is well located, with convenience (including Lidl, Fresh and Supervalu supermarkets) and comparison shopping available at nearby Thomas Street and Smithfield located approximately 1 kilometre from the subject site, as well as Heuston South Quarter located within 500m of the subject site. The audit area has a range of existing amenities which can be accessed by future residents of the proposed development.

The urban structure of the audit area is strong as the site benefits from proximity to a wide array of services at Smithfield, Thomas Street and Heuston South Quarter. The site is also situated at the western edge of Dublin City Centre, which provides an even wider range of community and social infrastructure and amenities. Additionally, there is a broad spectrum of health-related facilities within the immediate catchment area which affords a choice of services. Other numerous amenity facilities are situated around the immediate locality which residents can avail of such as sports clubs, gyms and parks.

The site is within walking distance of numerous bus routes which allows greater flexibility and access to an even wider range of services outside of the immediate locality. The development site is well served by public transport and within walking distance of a number of public transportation services, including Heuston Railway Station which is approximately 200m (a 3-minute walk) from the site and provides national and regional rail services. The Heuston and Museum Red Line LUAS stops are also immediately accessible. The nearest bus stop is immediately to the front of the site at Parkgate Street and is served by numerous bus routes including nos. 26, 69, C5, C6, 707, 842, 845, 51D, 52, 60, 735, C1, C2, C4, P29, 69X, X25, X27, X28, X30, X31 and X32.

As the population density in the audit area grows in accordance with strategic planning policy, it will become more important for services to be clustered and accessible.

It is considered that the application site at Parkgate Street is accessible to a good range of leisure facilities including sports grounds and clubs, Phoenix Park; a number of existing education facilities, including five primary schools, two secondary schools within the 1km study area, health services, arts and cultural facilities such as museums, galleries and art galleries and a quantum of community facilities located throughout the Dublin 7/Dublin 8 area. As such the facilities in the area provide a

good offering will be able to support the future residents of the proposed Parkgate Street development.

Furthermore, the consented and proposed development will contribute to the community infrastructure of the area by expanding the retail and restaurant offering, while also providing new, high quality public open space. The potential for cultural events is also provided through hire of the co-working spaces and use of the public open space, subject to appropriate consents and licencing. The proposed development will therefore enhance the community infrastructure that exists in the area.

The proposed development will enhance the contribution of the consented scheme to achieving the Council's 15 minute city concept
